AHLOA Web Survey

The presence of signs on Avalon Boulevard west of the 30th Street Bridge has been a subject of debate. Critics claim that the signs give a negative appearance to the entrance to town. Proponents say they need some way to communicate their events.

Avalon Planning Board is considering the issues. AHLOA is part of an advisory group to Planning Board. AHLOA has gathered the opinions of members to formulate a position to present to Planning Board. Over 300 members completed the survey, which was conducted on our web site, AHLOA.com.

The results are shown here without comment. AHLOA has not considered what position it will take at this time.

Thanks to those who took the time to take the survey.
